

FOSSIL FUN

with GoldieBlox!

In this activity, you'll practice excavating a dinosaur figurine from a plaster-like material. But first you'll have to let the mixture harden for a day or two. Excavating fossils takes patience!

YOU WILL NEED: (Safety first! Always ask an adult for permission and help)

- 1 cup cornstarch
- 1/2 cup of water
- small plastic container
- dinosaur figurine
- parchment paper
- 'excavation tools' (like a toothbrush)
- safety goggles

1

Pour cornstarch and water into a small plastic container. Stir.

2

Press one or two figurines inside the mixture.

3

Place outside in sun to dry for 24-48 hours.

4

Place parchment paper on an outside surface. (This might get messy!) Put on safety goggles.

5

Use tools like brushes and picks

6

Use tools-brushes & picks to excavate the figurines. Sweep leftovers into the trash.
